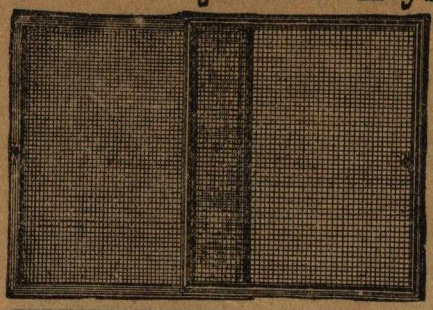
J. W. BOUGHTON'S
Adjustable "Keystone" Window Screen,



Hard Wood Frames, Green Wire.

This is a new Sliding Frame Screen without rods, and the best made screen of the kind in the market.

One dozen in a crate.

None of these Screens made to order.

No crates broken.

Weight of 1 doz. No. 21 about 27 lbs.

No.	Height inches.	Full width inches.	Price per dozen.
21	18	34	$3 60
22	18	38	4 20
24	20	34	4 20
25	20	38	4 80
27	24	34	5 40
28	24	38	6 00

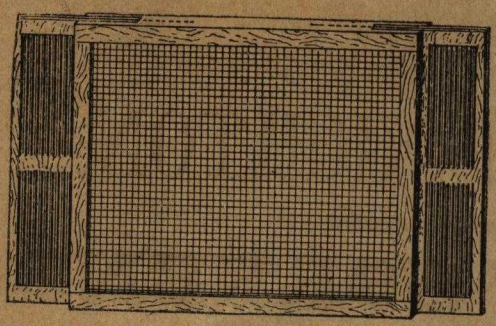
31	28	38	6 60
32	30	34	7 80
33	30	38	8 40

1891. BOUGHTON'S "GRATE" SCREEN, 1891.
A NEW SIDE SLIDE WINDOW SCREEN.
Patent Applied for



This Screen has two new improvements over all screens of this class now in the market.

1st.—The side pieces of thin wood, are filled with saw cuts, admitting air and light almost as freely as the wire cloth.

2d.—The side pieces of wood are strengthened by iron slides, which pass through saw cuts at the top and bottom, and are riveted in so that they cannot be broken, or split by any ordinary usage.

The objection to other screens of this class in having so much of the space taken up by the solid wood, is overcome, and we offer the screen on its merits.

PRICE LIST

IMITATION WALNUT AND HARD WOOD.

No.	Height inches.	Will extend from in.	Price each.	Price per dozen.
35	19	27 to 33	35 cts.	$4 20
36	19	33 " 39	40 "	4 80
37	24	23 " 27	35 "	4 20

40	28	27 " 33	55 "	6 60
41	28	33 " 39	60 "	7 20

One dozen in a crate.

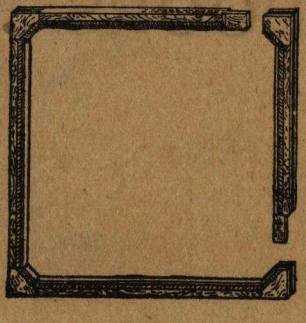
No Screens made to order, and no crates broken.

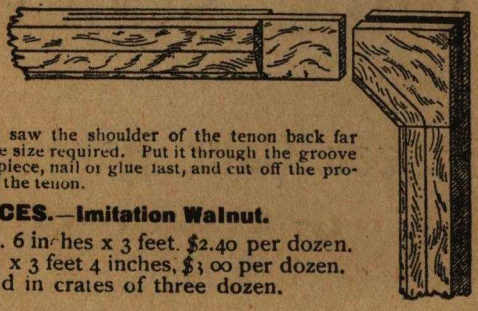
Weight of 1 dozen No. 35 about 20 lbs.

BOUGHTON'S "NEW" K. D. FRAME
FOR WINDOWS. (Patent applied for.)

This new frame is superior in all respects to any other now in the market. It has no iron corners to rust and get shaky. When put together it looks like a first-class screen made to order.

It has only four pieces with two sliding strips. Each piece consists of one side piece having a corner piece glued fast on one end, and a long tenon with very thin saw kerfs parallel with it at the other end.





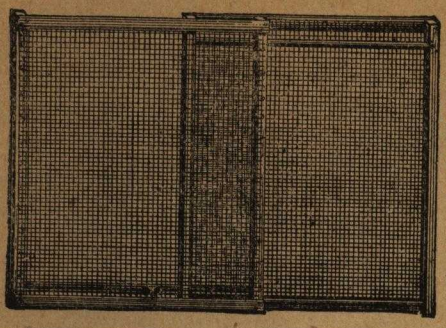
To Adjust saw the shoulder of the tenon back far enough for the size required. Put it through the groove in the corner piece, nail or glue fast, and cut off the projecting end of the tenon.

PRICES.—Imitation Walnut.

No. 320 2 ft. 6 inches x 3 feet. $2.40 per dozen.
No. 321 3 ft. x 3 feet 4 inches, $3 00 per dozen.
Packed in crates of three dozen.

1891. BOUGHTON'S 1891.

Adjustable Mosquito and Fly Screens, FOR WINDOWS.



This Screen has been in the market for fifteen years, and experience has proved that it will stand more rough usage, and do better service than any other screen in the market.

Other sizes made to Order.

Plain wire 12c per square foot.

One dozen in a Crate.

No Crates broken.

Weight of 1 doz. No. 1 about 24 lbs.

LOUDERBACK'S PERFECT WINDOW SCREEN.

Patented Dec. 12, '82. Jan. 26, '86.

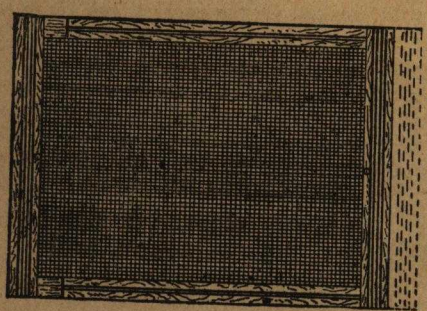
This is acknowledged to be the best of all the "side slide" screens in the market. It looks the same on both sides, and is used as an adjustable screen, or can be used as a stationary screen to slide up and down by simply using tongued strips on the sides of the windows.

On account of the former high price it has had but a limited sale in competition with the cheap and poorly made screens of its class.

We have bought from Mr. Louderback his patents, stock and special machines, and with our large facilities are able to put the screen on the market at **such low figures** as to insure a large sale.

PRICE LIST, IMITATION WALNUT.

Shows this open or extended.



Can be opened to dotted lines.

One dozen in a crate.

Weight of 1 doz. No. 401 about 30 lbs.

This Screen slides up and down in grooved strips fastened to the sides of the window.

To **Adjust**, simply run a saw or knife through the saw kerf, and cut off the top and bottom tenon. It can be done in a moment. Special sizes made to order with side stiles 2 inches wide, and plain wire at 15 cents per square foot.

☞NO CRATES BROKEN.

ELEUTHERIAN MILLS HISTORICAL LIBRARY

Trade Cat.

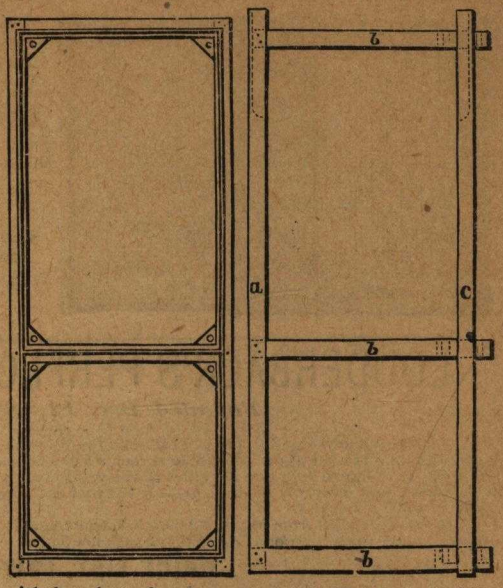
J. W. BOUGHTON'S

ADJUSTABLE KNOCK DOWN SCREEN FRAMES,

FOR DOORS,

Patented Jan. 11th, 1887.

To keep out Flies and Mosquitoes.



THE LIMIT of CHEAPNESS and SIMPLICITY has been reached in these frames, as an examination of them will show. They are mortised and tenoned, and can be put together in a few minutes by any person without mechanical skill, making as good a frame as any carpenter can make, and at half the cost.

IMITATION WALNUT.

No. 300, size 3 ft. x 7 ft. can be reduced to 2 ft. x 6 ft , each, 60c.

No. 301, size 3 ft. 6 in. x 8 ft. can be reduced to 2 ft. 6 in. x 7 ft., each, 65c.

☞This cut shows the frame as sold with brackets for the corners, *half round moulding*

to cover the *edges* of the *wire*, pieces to fill up the unused parts of the long mortise, wedges for the tenons, and nails, with directions for putting together. (Weight about 8 lbs. each.)

CHEAP WIRE SCREEN DOORS,
